

OVERVIEW

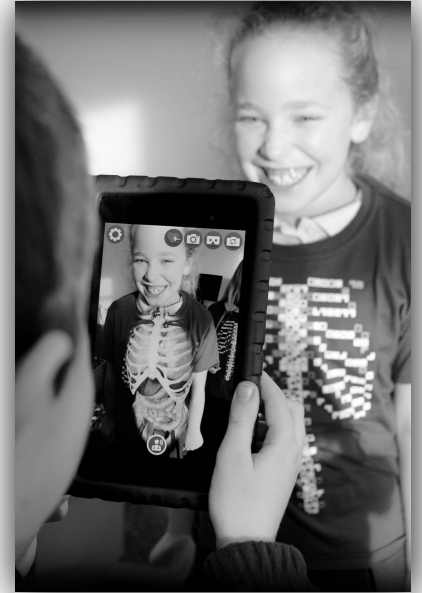

Aim High, Work Hard, Dream BIG!

DIGITAL INNOVATORS

At **The Parkland Federation**, educational technology is at the forefront of our curriculum offer. Our specialist Computing Teacher involves children in lessons that are immersive, collaborative, interactive and engaging. Our dedicated Computing Suite has a wealth of Chromebooks, robots, drones, sphero balls and virtual reality equipment that can transport the outside world into the classroom and vice versa. During School closures, our onsite classrooms are mirrored online, bringing education to our Google Classrooms. Here, teachers can be found delivering recorded learning as well as live lessons. Social interaction is utilised through the Google Classroom Stream as well as audio marking and feedback when work is completed. Children can even select books from the Virtual Book Corners.

Technology in education is evolving rapidly, and alongside our expert Computing Teacher, the Designated Safeguarding Lead ensures the school provides a thorough Online Safety Education for pupils. Regular advice and support is also provided for parents as they navigate the online world alongside their children. High priority is given to filtering and monitoring in order to keep children safe online. We believe that when online safety knowledge is prioritised, pupils and parents understand the dangers of releasing personal information as well as how to recognise concerning online behaviours, cyberbullying and ensuring a balance between online activity and emotional well being. **We believe that our outstanding teaching team, combined with the latest technology and commitment to online safety, ensures our digital learning is transformational.**
